EFFICIENT

ONZO is the brainchild-in-action of a team of successful business entrepreneurs who aim to ease the nation's transition from conventional fossil fuels to more sustainable energy forms without compromising modernity.

The leadership was harboured under a team of passionate members, and these people were the force that drove ONZO to flourish across various consumer brackets.

With years of experience in the global market and a passion for the future of e-mobility and sustainable energy systems, ONZO works to create vehicles that deliver a quality performance while preserving the environment.

ONZO's products are crafted with a futuristic design, focusing on the usage of Lithium-ion batteries, which omit the harmful carbon monoxide emitted from the burning of fossil fuels. Moreover, ONZO covers a diverse range of users, bridging all generation gaps and budget situations to tailor the vehicles to the requirements of their consumers.

The most impressive feature of this ICAT certified e-scooter is its non-requirement of a license or registration to drive.

The modern design language pairs with a retro theme that connects across wide generations with the brand's identity.

An apron-mounted front headlamp unit gives the scooter its timeless appearance. The cursive body panels, including the front mudguard, also come with an e-ABS that prevents your scooter from skidding, thereby ensuring a safe experience.
